Custom Interiors

Style • Comfort • Elegance

What do clients say about MG Custom Interiors?

Margaret assisted me in redesigning my home. She has an excellent sense of color and texture. I had a moderate budget and she geared the options with that in mind.

Margaret provided just the right number of choices in floor coverings, fabrics and paints which were manageable and not overwhelming for me. I appreciated Margaret offering options, but not forcing her tastes on me. I felt I could say "No" to samples without being concerned of offending her.

Margaret is a good listener and is hard working with good follow through. I will work with her again and highly recommend her without reservations.

--- B.B.

The perfect window treatments for my new home were always a priority for me. Just as every piece of furniture, the flooring, and even the colors of my walls had to be a reflection of who I am, so did my window treatments. As evidenced by the fact that they were not done until four years after my family and I moved into our new home, the window treatments had to be the "crowning jewel," the one thing that brought everything together.

Well...to say that MG Custom Interiors met my expectations would be a gross understatement. While the window treatment for each individual room gives that room its own distinct look and feel, every treatment works together to make one unified "personality" statement for my entire home.

Margaret made the whole process such an enjoyable experience – from working with her to select just the right fabric for each room to watching the final installation -- that I was almost sad to see it end, despite being absolutely elated with the results!

Top notch! Margaret's trained eye totally transformed our out-dated Arlington Heights home. We constantly receive compliments from visitors to our home, i.e. how warm, inviting and beautiful our home is.

We were so pleased with her work, we had Margaret do all our interior design for our lake house in Wisconsin. Margaret "thinks outside the box" Very professional with impeccable taste.

My husband loved that Margaret kept us within our budget. Margaret is not only very knowledgeable about her craft, she is current on all decorating trends in the industry.
