

The HR SmartSource Difference

HR SmartSource provides customized, personal staffing solutions to firms seeking to fill professional and technical positions. Our services are competitively priced because we don't have the high overhead costs of the larger firms, have developed an extensive recruitment network, and use innovative, focused techniques to fill your jobs.

We believe that the foundation for hiring the right person is character, competency, and chemistry. If for some reason an employee does not work out, we will repeat the hiring process at no charge. We will do whatever it takes – satisfaction guaranteed.

"I founded HR SmartSource to provide clients with personalized service that delivers top candidates. I care about you, your budget, and that the candidates I send you are truly qualified.

I have experienced recruiting from both sides of the desk - from an internal HR department with recruiting goals to a large recruitment firm placing job orders and successfully hiring candidates.

My mission is to become an extension of your human resources department and provide you a truly professional experience – efficient, customized, and a competitive value."
